

ASPIRING DATA ANALYST | PYTHON | SQL | DATA ANALYTICS

PROFILE

A motivated Computer Science and Engineering student with a strong foundation in Python in Data Analytics and Data Science. Passionate about learning new technologies, solving real-world problems, and developing innovative software solutions. A quick learner with good teamwork and communication skills.

EDUCATION

NPR COLLEGE OF ENGINEERING AND TECHNOLOGY

2023 - 2027

- Bachelor of Engineering in Computer Science and Engineering (Honours)
- Current CGPA: 8.57

VIDHYA PARTHI HIGHER SECONDARY SCHOOL

2022 - 2023

- HSC (Bio-Maths): Passed with 75.5%

ST. ANTONY'S HIGHER SECONDARY SCHOOL

2019 - 2020

- SSLC: Passed with 100%

PROJECT EXPERIENCE

INTERNSHIP PROJECT

E-Commerce & Healthcare Analytics Dashboard

- Developed E-Commerce and Healthcare dashboard applications.
- Built frontend and backend features.
- Integrated REST APIs for data display.
- Created interactive dashboards and charts.
- Worked with React, Python, FastAPI, and PostgreSQL.
- Tested and deployed the application.

Technologies: React, TypeScript, Tailwind CSS, Axios, Python, FastAPI, PostgreSQL, SQLAlchemy, Git, GitHub.

Project :

MINI-PROJECT

HoloMed HCI (Healthcare Analytics Prototype)

- Developed a healthcare analytics prototype.
- Designed a user-friendly interface using HCI principles.
- Applied data analytics to healthcare data.
- Built dashboards to support medical decision-making.

Technologies: Python, Data Analytics, Human-Computer Interaction (HCI).

CERTIFICATION & PARTICIPATION

- Data Science Workshop (NIT Trichy):** Learned data analysis techniques and practical problem-solving through hands-on sessions.
- Online Certifications:** Completed courses in Data Science and Advanced Analytics.
- Shell Cycle Project:** Worked in a team to develop a hardware and software integrated project and presented it at 13+ national-level technical events.
- Hackathons:** Participated in hackathons, gaining experience in teamwork, rapid prototyping, and technical presentations.

SKILLS

- Programming Languages: Python, Java, SQL
- Frontend: React, HTML, CSS, TypeScript
- Backend: FastAPI
- Database: PostgreSQL
- Tools: Git, Command Line
- Domains: Data Analytics, Human-Computer Interaction (HCI)
